PROFESSIONAL SUMMARY

Final-year Information Technology student at Del Institute of Technology with hands-on full-stack experience across many projects. Comfortable working in collaborative, cross-role teams from design through deployment.

PROJECTS

- Frontend Developer** | Jason Jewelry (Jewelry Store Management System) June 2026 – Present
- Built admin CRUD modules for products and trays with Next.js, integrated with a Go/Echo REST API backend.
 - Developed a responsive multi-section customer storefront and the login page, working with the backend developer on the authentication flow.
- Full-Stack Developer** | SIGAP (Generative Adaptive Village Service Information System) August 2026 – Present
- Developed a village service information system with a generative feature that lets non-technical village staff create new service features themselves.
 - Removed the wait for IT-team sprint development, so new village services can be launched without engineering work.
- Full-Stack Developer** | TobaNiaga (Multi-Vendor E-Commerce for Local SMEs) June 2026 – Present
- Built a Laravel platform with four roles (customer, sales, courier, admin) using Spatie Permission, Alpine.js, and Tailwind CSS.
 - Integrated Midtrans checkout and designed an order fulfillment flow with a courier job pool and a courier fund withdrawal feature.
- Full-Stack Developer** | MedFlow (Public Transport Tracking App) April 2026 – June 2026
- Won 2nd place at Medan Coding Competition 2026. Built the core real-time angkot tracking feature, including live driver markers on the map and trip lifecycle management.
 - Deployed on AWS App Runner with an AWS RDS database; tested the Flutter app across multiple devices.
- Backend Developer** | SI-DOBAT (Pharma Logistics) January 2026 – June 2026
- Developed Laravel microservices and refactored data synchronization into an event-driven design with snapshot tables.
 - Deployed with Docker and Nginx on a Biznet VPS, with Midtrans webhook and email notifications for account creation and order status.
- Full-Stack Developer** | ALIN (Linear Algebra Learning Platform) January 2026 – August 2026
- Built a lecturer portal (quiz, bulk question import, student management, quiz results) and a placement test feature in the Flutter mobile app.
 - Modernized the UI with a consistent blue-gradient design system; hosted the full stack on AWS EC2.
- Mobile Developer** | CampusTalk (Campus Community Mobile App) September 2025 – December 2025
- Developed an internal mobile app for information sharing and conversations across the Institut Teknologi Del community, open to students, lecturers, and campus staff.

EDUCATION

Institut Teknologi Del - Diploma 3 (D3) in Information Technology August 2024 – September 2027
GPA: 3.57 / 4.00 | Relevant Coursework: Mobile Application Development, Web Development, Cloud Computing Systems, Computer Networks, Distributed Applications and Virtual Services, Software Quality Assurance

AWARDS & ORGANIZATIONS

- 2nd Place** | Medan Coding Competition (MedFlow app) May 2026
- Built MedFlow, a real-time public transport (angkot) tracking app, and placed 2nd in the competition.
- 3rd Place** | Marpesta QRIS – Business and Innovation Plan Competition, Bank Indonesia Pematangsiantar Office July 2026
- Proposed TaniCerdas AI, a rice and corn disease detection service with QRIS-based farm input recommendations, and placed 3rd.
- Educator Division** | Himatif, Del Institute of Technology August 2025 – Present
- Tutor junior and first-year students in academic subjects, including [subject, e.g. programming fundamentals].
 - Organize programming competitions, quizzes, and other learning activities for HIMATIF members.

SKILLS & CERTIFICATIONS

Technical Skills: PHP, Laravel, Dart, Flutter, JavaScript, Next.js, React, Tailwind CSS, Alpine.js, REST API, Docker, Nginx, AWS, VPS Deployment, Git/GitHub

Soft Skills: Teamwork, Communication, Problem Solving, Time Management

Languages: Indonesian (Native), English (TOEFL 500)
